SUMMARY

- Cloud infrastructure engineer with 12+ years in enterprise IT across Singapore and the APAC region, pairing hands-on AWS and Azure build work with deep on-premises infrastructure, identity, and networking experience.
- AWS Certified Solutions Architect – Associate and AWS Certified CloudOps Engineer – Associate; deploys infrastructure with Terraform, Git, and keyless CI/CD in self-directed lab environments.
- Strong hybrid-cloud grounding: migrated core enterprise applications into Tier-3 co-location under a S\$2M programme, administers AWS IAM and Microsoft Entra ID side by side, and runs a multi-site Proxmox VE and MikroTik lab covering VLANs and WireGuard VPN.
- Owns infrastructure end to end — automation, least-privilege access, perimeter security, and Tier-3 escalation — and translates technical detail into clear stakeholder decisions.
- Available from January 2027.

SKILLS

Cloud Platforms: AWS (VPC, EC2, S3, IAM, CloudFront, Lambda, Route 53, WAF)

Microsoft Cloud: Microsoft Entra ID (Azure AD), Microsoft Intune, Conditional Access

Infrastructure as Code: Terraform · Git

CI/CD: GitHub Actions (OIDC keyless deployment)

Containers & Virtualization: Docker · Proxmox VE

Networking: TCP/IP · DNS · Routing · VLANs · MikroTik · WireGuard · Firewall Administration

Scripting: PowerShell · Bash

CERTIFICATIONS

AWS Certified CloudOps Engineer – Associate	Aug 2026
AWS Certified Solutions Architect – Associate	Jul 2026
AWS Certified Cloud Practitioner	May 2026
Microsoft Certified: Azure Administrator Associate (AZ-104) — <i>in progress</i>	Est. Oct 2026
HashiCorp Certified: Terraform Associate — <i>in progress</i>	Est. Nov 2026
ITIL 4 Foundation (<i>Certificate ID: GR671273878OY</i>)	May 2021

CLOUD & INFRASTRUCTURE PROJECTS

Personal Resume Website | *Next.js, S3, CloudFront, Route 53, WAF, Lambda, SNS, GitHub Actions (OIDC)*

- Deployed a live Next.js resume site on AWS, adapting an open-source template: S3 static export served via CloudFront with a custom domain, ACM TLS, and blocked direct bucket access.
- Automated releases with GitHub Actions using OIDC role assumption — no stored access keys — so each merge to main builds, syncs, and invalidates the CDN.
- Hardened the stack with AWS WAF rules and least-privilege IAM, and added a serverless contact form (Lambda + SNS) that emails me on submission.

Virtualization & Networking Lab | *Proxmox VE, MikroTik, Docker, WireGuard*

- Built a multi-site homelab using Proxmox VE, MikroTik, Docker and WireGuard VPN.
- Deploy containerized workloads and virtual machines to simulate production environments.
- Configure VLANs, VPN tunnels, firewall rules, and network segmentation.

EXPERIENCE

Wargaming Asia

Feb 2023 – Present

IT Manager, APAC

Singapore

- Administer endpoint compliance and identity security for 200 users across a Windows and macOS estate using Microsoft Intune, Microsoft Entra ID (Azure AD), and Conditional Access.
- Lead infrastructure validation, pilot deployments, and regional rollout of global IT initiatives across Singapore, Japan, and South Korea.
- Developed PowerShell automation to automate Secure Boot certificate validation and language-pack deployment, reducing manual setup time by 20%.
- Redesigned service desk workflows and introduced proactive endpoint monitoring, reducing recurring incident escalations by 20%.

TabSquare

Jun 2022 – Feb 2023

Operations Manager

Singapore

- Restructured an 8-person support team into two specialized units — Project Delivery and Technical Support — separating deployment work from reactive maintenance, which improved deployment speed by 20%.
- Standardized the end-to-end client onboarding workflow and transferred ownership to autonomous team leads, cutting leadership escalations by 20% and increasing onboarding capacity by 40%.
- Designed and delivered technical training covering IP networking, OS virtualization, and database fundamentals, improving the team's ability to troubleshoot issues independently.

Safra

May 2021 – Jun 2022

IT Infrastructure Lead

Singapore

- Administered identity and access management across Microsoft Entra ID (Azure AD), Microsoft 365, and AWS IAM, including least-privilege access control, user provisioning, and group management.
- Led migration of core enterprise applications — including Microsoft Dynamics AX ERP and gaming systems — into Tier-3 co-location facilities as part of a S\$2M digital transformation programme, with minimal downtime.
- Configured and troubleshoot hybrid network security perimeters, managing Layer 4/7 stateful filtering across F5 WAF, Palo Alto, and Check Point Next-Gen Firewalls.
- Served as final Tier-3 escalation owner for systemic server and infrastructure issues, and supervised outsourced desktop support vendors.

McDonald's Singapore

Dec 2017 – May 2021

IT Consultant II

Singapore

- Integrated GrabFood and Foodpanda with the POS system to automate order processing, improving kitchen fulfilment speed by 60% and contributing to a 25% increase in digital sales.
- Led hardware staging, configuration, and network readiness for the nationwide rollout of the McDonald's Singapore mobile app across 135 outlets.

Systems Design

Dec 2013 – Dec 2017

Computer Technician

Singapore

- Built a diagnostics script (Batch) to scan client endpoints and extract hardware models, IP addresses, and serial numbers, replacing manual asset tracking during rollouts.

EDUCATION

Temasek Polytechnic

Sep 2020 – Oct 2022

Diploma in Infocomm and Digital Media

Singapore
