- IT Operations Leader with 10+ years experience transitioning to cloud infrastructure engineering through intentional skill development and portfolio projects.
- AWS Certified Solutions Architect – Associate and AWS Certified CloudOps Engineer - Associate, with hands-on experience deploying cloud infrastructure using Terraform, Git, and CI/CD in self-directed lab environments.
- Solid foundation in enterprise infrastructure, identity and access management, and regional IT operations across multi-country environments.
- Strong cross-functional communicator who translates complex technical issues into clear stakeholder insights, bridging the gap between business objectives and IT operations.
- Available from January 2027.

SKILLS

CLOUD

- AWS (VPC, EC2, S3, IAM)

INFRASTRUCTURE AS CODE

- Terraform
- Git

CONTAINERS

- Docker

IDENTITY

- Microsoft Entra ID
- Microsoft Intune

VIRTUALIZATION

- Proxmox VE

NETWORKING

- MikroTik
- WireGuard
- TCP/IP
- DNS
- Routing
- Firewall Administration

SCRIPTING

- PowerShell
- Bash

CERTIFICATIONS

ITIL 4 FOUNDATION, CERTIFICATE ID: GR671273878OY

MAY 2021

CERTIFIED CLOUDOPS ENGINEER – ASSOCIATE, AWS

AUG 2026

CERTIFIED SOLUTIONS ARCHITECT – ASSOCIATE, AWS

JUL 2026

CERTIFIED CLOUD PRACTITIONER, AWS

MAY 2026

IN PROGRESS

- **AZURE ADMINISTRATOR ASSOCIATE, MICROSOFT**
- **TERRAFORM ASSOCIATE, HASHICORP**

Estimated: **OCT 2026**

Estimated: **NOV 2026**

PROJECTS

INFRASTRUCTURE AS CODE WITH AWS & TERRAFORM

- Designed and provisioned AWS VPCs, EC2 instances, IAM roles, security groups, and S3 buckets using Terraform in a dedicated personal lab environment to build production-grade IaC skills.
- Manage Terraform state and reusable modules following Infrastructure as Code best practices.
- Version-control infrastructure using Git and GitHub.

VIRTUALIZATION & NETWORKING LAB

- Built a multi-site homelab using Proxmox VE, MikroTik, Docker and WireGuard VPN.
- Deploy containerized workloads and virtual machines to simulate production environments.
- Configure VLANs, VPN tunnels, firewall rules, and network segmentation.

PROFESSIONAL EXPERIENCE

IT MANAGER, APAC, WARGAMING ASIA

FEB 2023 – CURRENT

- Manage regional IT operations across Singapore, Japan, and South Korea, overseeing a S\$100K annual budget, vendor performance, and SLA compliance.
- Administer endpoint compliance and identity security across 200 users Windows/macOS environment using Microsoft Intune, Microsoft Entra ID (Azure AD), and Conditional Access.
- Lead infrastructure validation, pilot deployments, and regional rollout of global IT initiatives supporting 200 users across Singapore, Japan, and South Korea.
- Manage core office infrastructure, network, and unified communications (including Microsoft Teams Rooms), covering patch compliance and identity lifecycle management.
- Developed PowerShell automation to automate Secure Boot certificate validation and language-pack deployment, reducing manual setup time by 20%.
- Redesigned service desk workflows and introduced proactive endpoint monitoring, reducing recurring incident escalations by 20%.

OPERATIONS MANAGER, TABSQUARE

JUN 2022 – FEB 2023

- Restructured an 8-person support team into two specialized units - Project Delivery and Technical Support - separating deployment work from reactive maintenance, which improved deployment speed by 20%.
- Standardized the end-to-end client onboarding workflow and transferred ownership to autonomous team leads, cutting leadership escalations by 20% and increasing onboarding capacity by 40%.
- Partnered with Product Engineering to provide deployment feedback and recurring application defect trends, contributing to product improvements and release planning.
- Designed and delivered technical training covering IP networking, OS virtualization, and database fundamentals, improving the team's ability to troubleshoot issues independently.

IT INFRASTRUCTURE LEAD, SAFRA

MAY 2021 – JUN 2022

- Managed a \$100K annual operating budget for Office 365 configuration, hardware fleet maintenance, and repairs.
- Led data center migrations as part of a \$2M digital transformation initiative, moving core enterprise applications - including Microsoft Dynamics AX ERP and gaming systems - into Tier-3 co-location facilities with minimal downtime.
- Configured and troubleshooted hybrid network security perimeters, managing Layer 4/7 stateful filtering across F5 WAF, Palo Alto, and Check Point Next-Gen Firewalls.
- Administered identity and access management across Microsoft Entra ID (Azure AD), Microsoft 365, and AWS IAM, including user provisioning, group management, and access control.
- Supervised outsourced desktop support vendors and served as final Tier-3 escalation owner for systemic server and infrastructure issues.

IT CONSULTANT II, MCDONALD'S SINGAPORE

DEC 2017 – MAY 2021

- Managed outsourced IT vendors to ensure SLA compliance, hardware availability, and operational support across 135 restaurant outlets, covering 500+ self-order kiosks, 1,000 POS terminals, and 2,000 kitchen display systems.
- Integrated GrabFood and Foodpanda with the POS system to automate order processing, improving kitchen fulfillment speed by 60% and contributing to a 25% increase in digital sales.
- Led hardware staging, configuration, and network readiness for the nationwide rollout of the McDonald's Singapore mobile app across 135 outlets.

COMPUTER TECHNICIAN, SYSTEMS DESIGN

DEC 2013 – DEC 2017

- Built a diagnostics script (Batch) to scan client endpoints and extract hardware models, IP addresses, and serial numbers, replacing manual asset tracking during rollouts.
- Staged and configured servers for customer deployments, alongside edge hardware - Cisco routers, switches, thin clients, and wireless access points.

EDUCATION

DIPLOMA IN INFOCOMM AND DIGITAL MEDIA,
TEMASEK POLYTECHNIC

SEP 2020 – OCT 2022
